FOR IMMEDIATE RELEASE

July 22, 2010

Lummi Island Dry Dock Shuttle Van Returning to Service

Whatcom County Public Works would like to inform the public that the emergency repair to the Lummi Island dry dock shuttle van is continuing. We expect the repair to be completed by 5:20 p.m. this afternoon.

WTA has graciously provided the use of one of their shuttle buses until the ferry shuttle van can be repaired. WTA is also willing to leave their shuttle bus on Lummi Island for the duration of dry dock in case any further repairs are needed to the ferry shuttle bus. Public Works would like to extend our thanks to WTA for this outstanding intergovernmental cooperation in our time of need.

The shuttle van will begin making runs this evening with the 5:25 p.m. south loop schedule.

The Public Works Department would like to thank everyone for their cooperation and patience during this necessary repair.
